

Company: Herding Filtration, LLC
Status: Full Time Employee
Job Title: Technician
Experience: 0- 5+ Years
Education: Minimum requirement is a High School Diploma or equivalent
Location: Troy (MI)

Position Summary:

The position will include performing service and maintenance of our filtration systems throughout the US and occasionally abroad. In addition to completing service the selected candidate will provide quotations for spare parts and service when not traveling. Mechanical and electrical fundamentals will be required for identifying and solving customer issues along with understanding the parts and components which make our systems function properly.

Position description:

The projects Herding Filtration deals with range from single piece of equipment supply to complete turn-key systems (which include electrical, ductwork, and many other components and devices). The technology focuses mainly with dust collection and pneumatic conveying receivers. The product is custom engineered equipment and requires a strong connection with a customer.

As a technician you will:

- Travel to customer sites and provide scheduled and emergency maintenance
- Develop a technical understanding of how our filtration systems work and integrate with customers equipment
- Work with our service manager on services, spare part management and inventory
- Become familiar with spare part requirements of our customers
- Work independently on providing quotations and phone support for our customers
- Work with your hands, replacing parts, taking measurements, documenting a reporting results and conclusions internally and externally
-

Requirements:

- High School Diploma or equivalent
- Strong mechanical and electrical system drive/willingness to be trained
- Valid driver's license and Passport (or ability to obtain)
- Forklift/Lift operating and/or certifications (or ability to obtain/train)
- Ability to trailer equipment/parts between workshop/customers
- Knowledge of filtration systems is not required, motivation to learn required
- Motivated for highly technical work
- Knowledge of CAD a plus (Autodesk Inventor preferred)
- Ability to work both independently and within a team environment
- Travel to customer's sites & suppliers will be required domestically and globally
- Office suite, specifically excel/word to provide spare part and service quotations
- High energy, Self-motivated personality
- Represents the organization at all times in a professional, competent manner, in keeping with the high ethical standards of the organization.
- Ability to lift 50 lbs in a variety of environments

- Automotive
- Aerospace
- Food production
- Chemical processes
- OEM's: Laser cutting and welding systems, metal 3D printing systems, painting systems
- Paint systems
- Ceramic industries
- Metal processes: Stamping, cutting, grinding, blasting

About us:

In 1977 Walter Herding established the Herding GmbH enterprise in Amberg, Germany. In the beginning, it was cloth and needle felt filters which were produced for mining and rock processing. However, in 1978 the idea to create an alternative, using sintered plastics, was developed and thus, in 1981 & 1982, the Herding sinter plate filter was born. This invention, the sinter plate filter element with patents all over the world, revolutionized the status of the filter technology and formed the basis for the expansion and the success of Herding Filtertechnik. Today we are a worldwide operating enterprise with ~500 employees at the headquarters in Amberg and various affiliates all over Germany, plus companies in Belgium, China, the Czech Republic, France, The Netherlands, Switzerland, the United States, Poland, Italy, Turkey and further co-operation partners worldwide. Main US office in Troy, MI with satellite locations in Denver, Cleveland, Chicago.

Herding Filtration, LLC will provide a competitive salary, and benefits package with this full-time position.
